

Hambley's expertise, passion for job is obvious

One of the bright spots in Medina County is Commissioner Steve Hambley. He has done a fabulous job and has earned the right to serve another term. Commissioner Hambley has been an advocate of Medina County and truly understands the needs of the people and knows the diverse history and rich backgrounds of communities throughout the county.

In 2011, Commissioner Hambley was President of the Northeast Ohio Areawide Coordinating Agency, a board he has served on for 15 years. Over the years on NOACA, Commissioner Hambley helped secure tens of millions of dollars for a number of Medina County projects. One of these projects is the highly anticipated Brunswick traffic signalization project. The city was awarded \$4.9 million for this project and will include traffic signal rehabilitation on Center Road, Grafton Road, Pearl Road, Laurel Road and West 130th Street. The project will start this year and once completed will help alleviate traffic congestion through the city.

Commissioner Steve Hambley has a Ph.D. from the University of Akron and has over 16 years of teaching experience in politics, government and history. This coupled with the fact that he once served as a Brunswick City Councilman, I believe Commissioner Hambley understands the difficulties our communities face today. I have personally worked with Commissioner Hambley on many projects and can assure you Steve is passionate about his work and has a genuine desire to help Medina County succeed. Please join me in voting to keep Steve Hambley Commissioner on March 6.

Chuck Ricco
